

Doing Disasters Differently

Community Disaster Support Plan

We help you identify your role to play – before, during & after disasters.

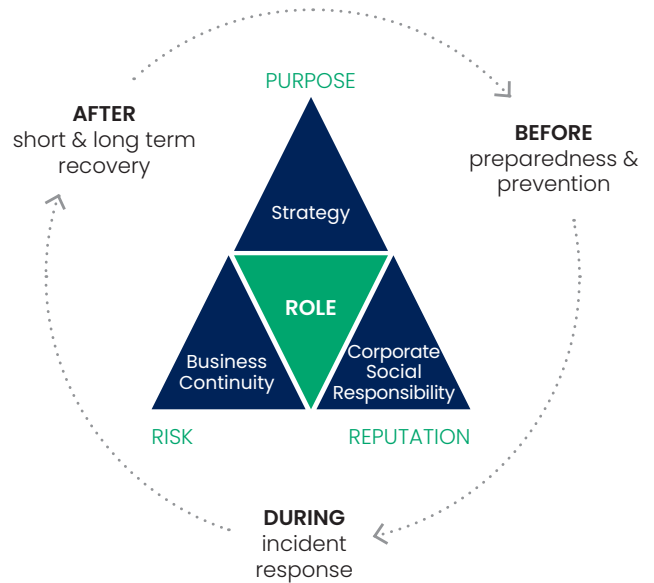

Every business has capabilities that can help communities prepare for, prevent, respond to and/or recover from natural and human-induced disasters.

The challenge is knowing what your 'shared responsibility' role should be and informing your employees and customers of your commitment for when they will need you most.

Through our deliberate 5-step process we align your strategic purpose, business continuity & risk management approaches and corporate social responsibility & reputation tactics.
