

Doing Disasters Differently

# Disaster Resilience Organisation Plan

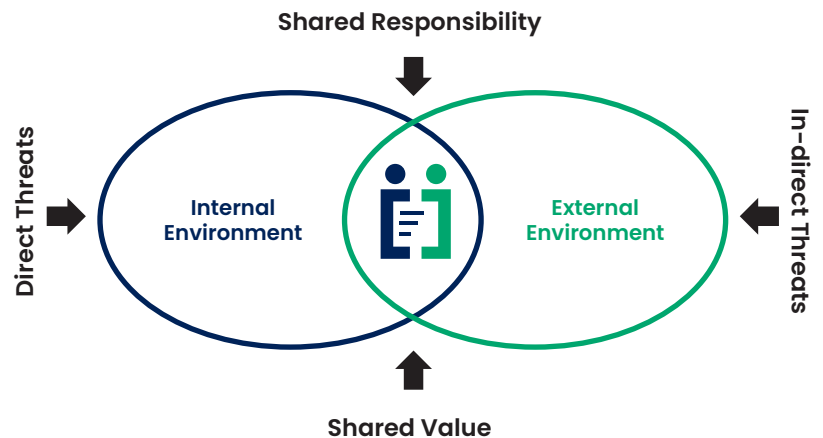

We put a holistic lens across your business to reduce disaster risks and drive disaster resilience.

The ability to be resilient to more frequent, more destructive and compounding disasters is vital to the economic and social wellbeing of any organisation.

We assist your organisation to establish holistic business-as-usual approaches, so its people, property and profits thrive, not just survive the many future impacts to come.

Bigger than traditional business continuity and risk management approaches, C2C will challenge your processes and policies across all business functions from a disaster resilience and community resilience lens.

The outcome of a Disaster Resilience Organisation Plan is to understand, identify and mitigate both internal and external disaster risk reduction vulnerabilities – with a holistic approach, not driven by siloed teams.
